KNOYA / SOURCE-GROUNDED SUPPORT OPERATIONS

Zylvoo Solutions · Independent interactive portfolio concept

Why this workspace exists

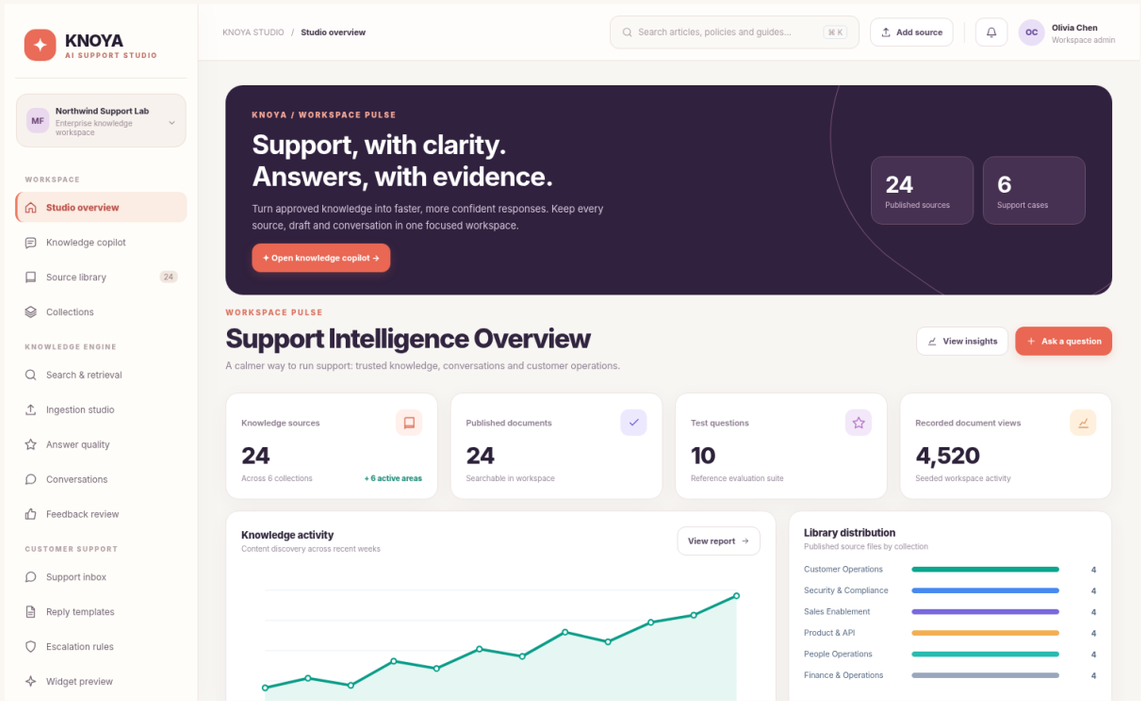

The problem, the opportunity, and the design direction.

THE CHALLENGE

Support answers live across multiple documents, internal notes and team memory. Agents spend time searching instead of helping, and may miss the latest policy.

DESIGN GOAL

Give teams one place to find verified knowledge, handle tickets and review responses before sharing them.

A more connected support workflow

One coherent journey from incoming case to an evidence-backed response.

01

CAPTURE

Log or open a customer request.

02

LOOK UP

Search approved knowledge records.

03

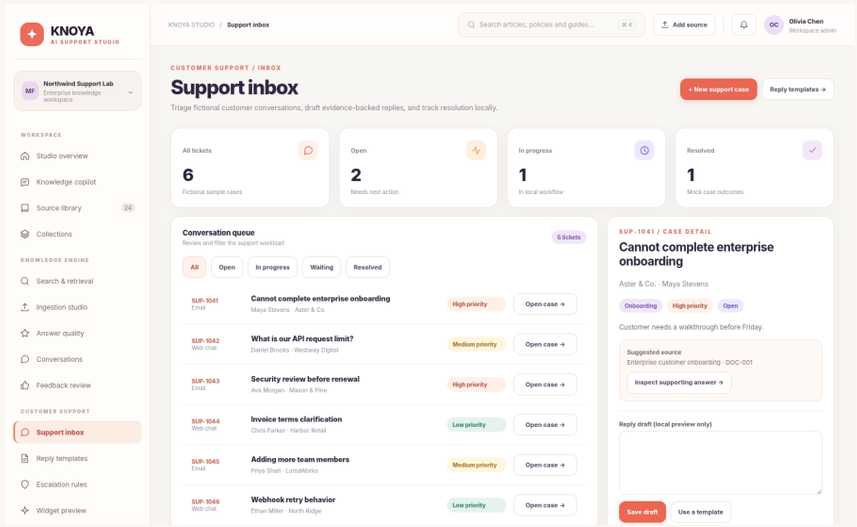

REFERENCE

Check matched citations and context.

04

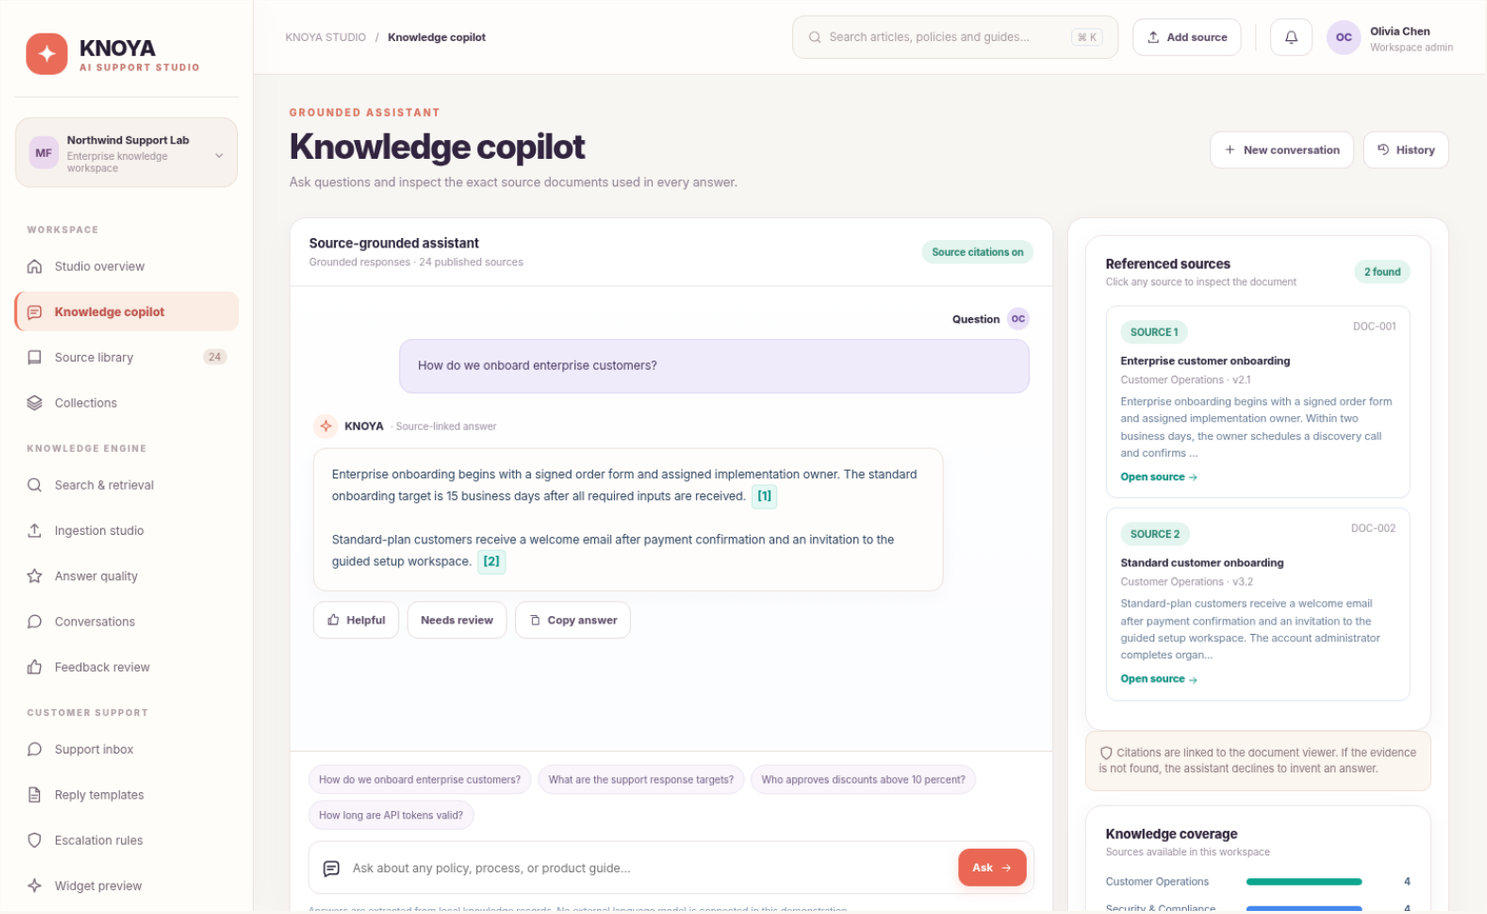

REVIEW

Draft, edit and escalate when needed.

Knowledge copilot with citations

Designed around the principle that a good answer can be checked.

WHY SOURCES MATTER

Contextual retrieval

Matches questions to published sample sources.

Visible evidence

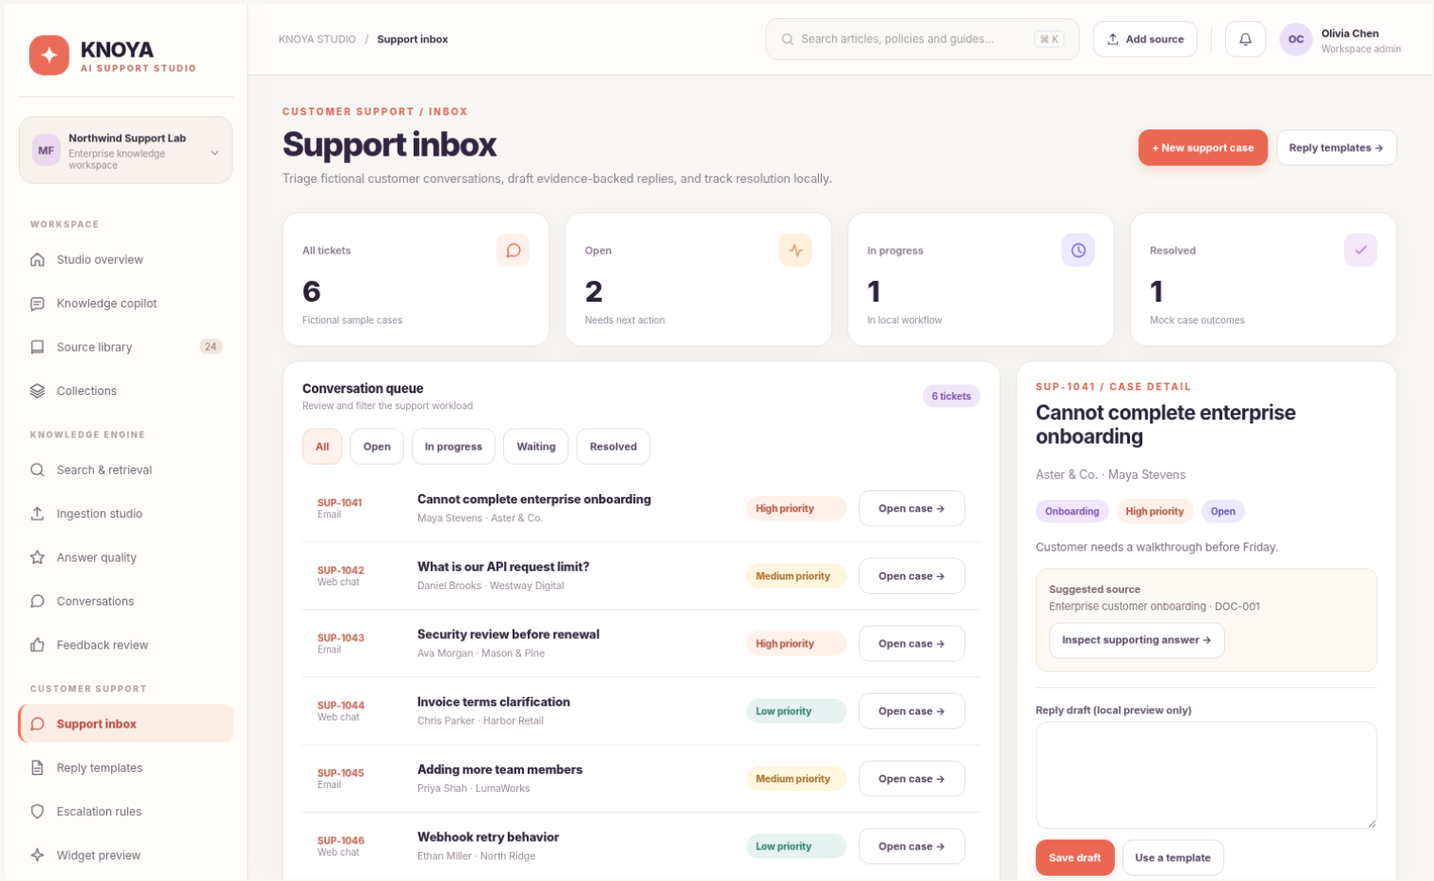

Replies reference the documents used.

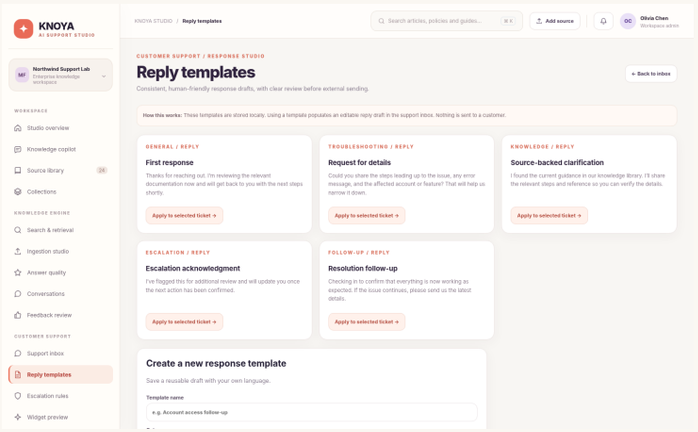

Trustworthy fallback

When a source is missing, no answer is invented.

From tickets to reply drafts

Support Inbox and Reply Studio bring the conversation into focus.

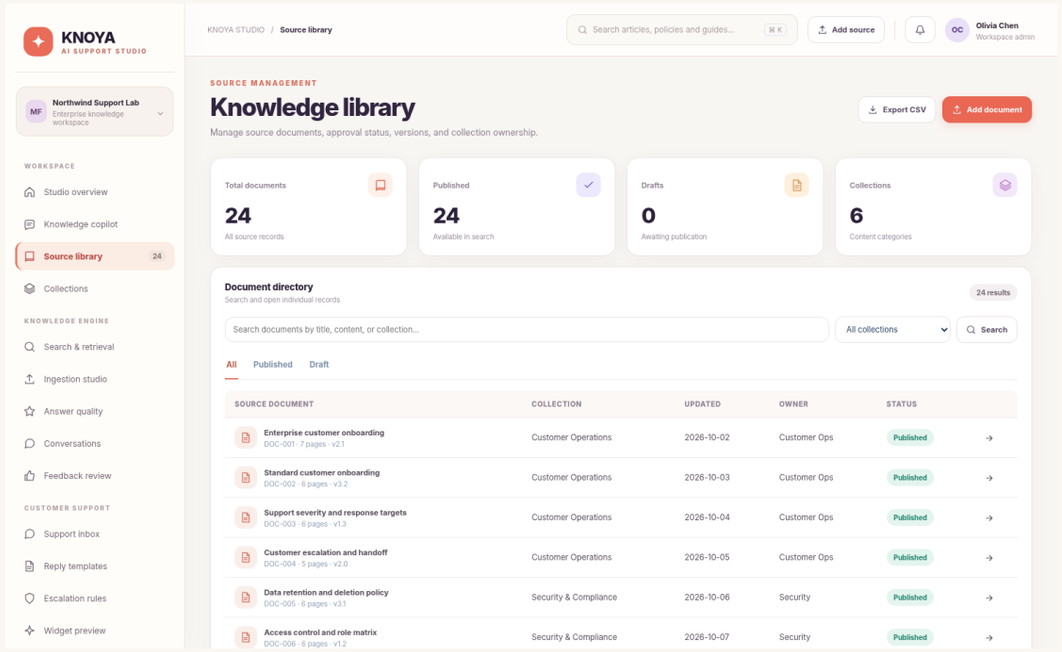

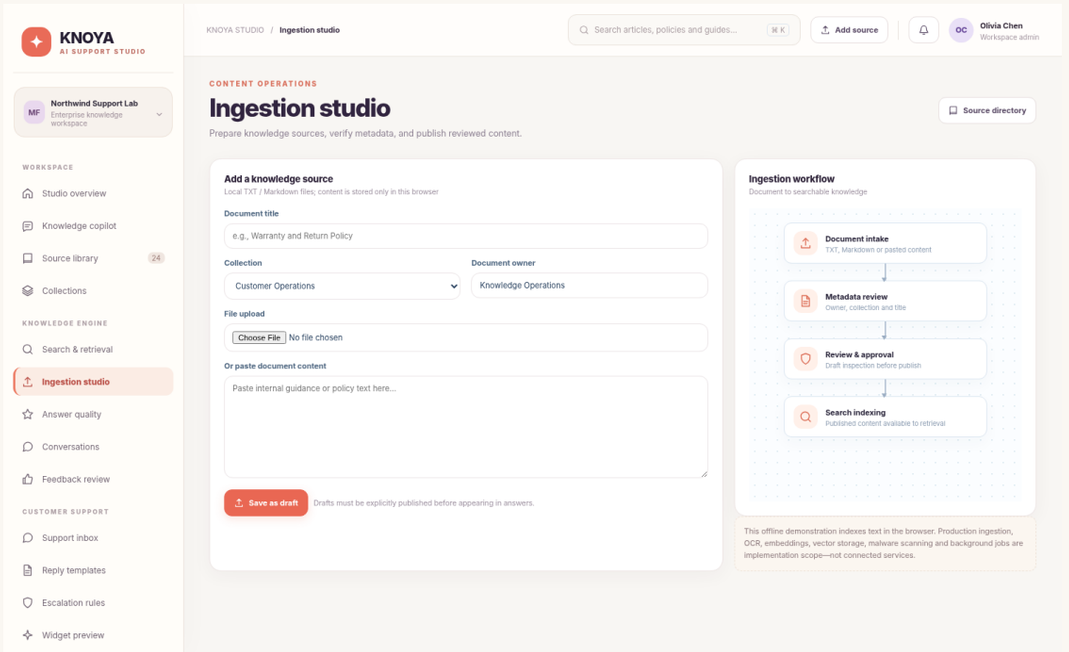

REVIEW-FIRST WORKFLOW

No messages leave the browser.

A well-kept knowledge library

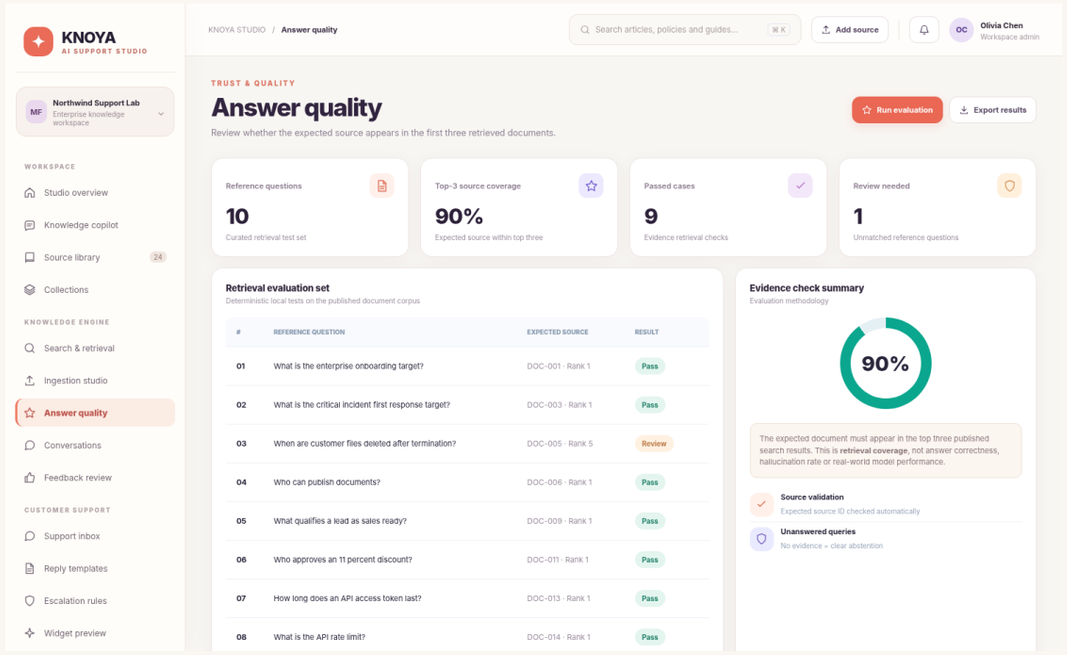

Ingestion, review, source status and evidence are first-class experiences.

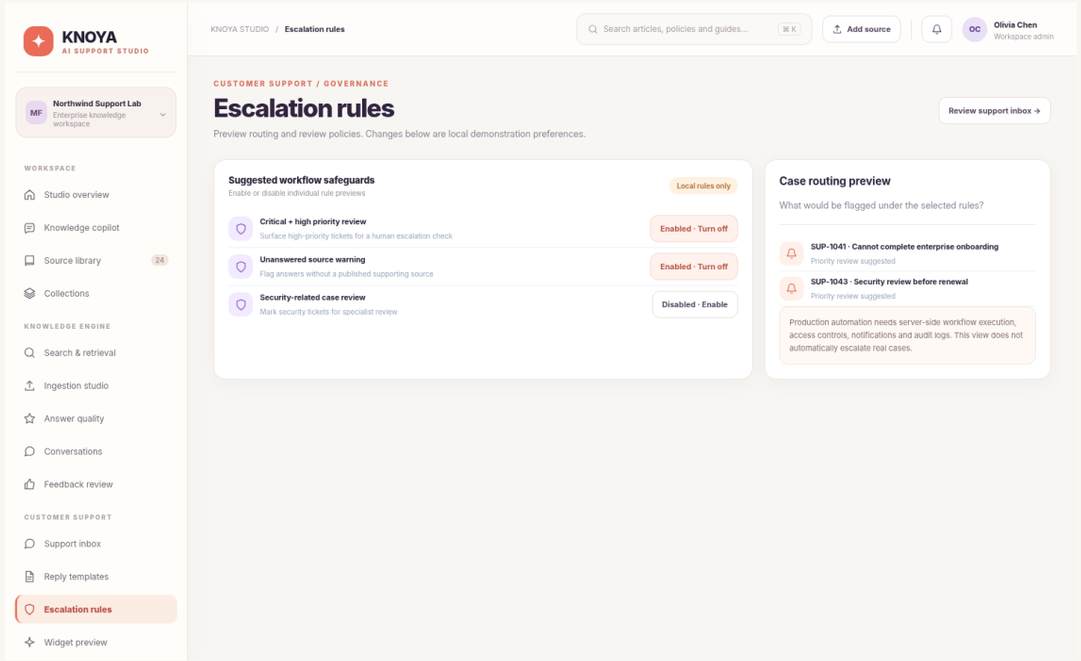

Product quality & governance

Search diagnostics, evaluation checks and rule-preview controls.

10 sample evaluation questions

Measures top-three document retrieval coverage in the local demo; not live LLM accuracy.

The visual language

Warm editorial canvas, clear typography and purposeful moments of color.
